Legacy JavaScript Algorithms and Data Structures, (freeCodeCamp)

LANGUAGE

- English
- Urdu

OBJECTIVE

Motivated and detail-oriented MERN Stack Developer with hands-on experience in React.js, Next.js, Node.js, Express, and MongoDB. Currently pursuing a BSCS degree (Virtual University) and working as a MERN Stack Intern at Suffah Tech. Skilled in building responsive, scalable, and user-friendly applications with a strong focus on problem-solving and teamwork. Seeking opportunities to apply technical expertise, contribute to impactful projects, and grow as a professional developer.

SKILLS

- Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Ant Design
- Backend:** Node.js, Express.js, RESTful APIs, Authentication (JWT, Firebase Auth)
- Database:** MongoDB, Firebase, Mongoose (CRUD)
- State Management:** Redux, ContextApi, Zustand
- Version Control:** Git, GitHub, Responsive Design
- Other Tools:** Stripe Payment, Cloudinary, Deployment (Vercel, Netlify, Render)

PROJECT

- E-commerce Platform:** (Next.js + TypeScript + MongoDB) – Developed a full-featured e-commerce site with product management, authentication, and Stripe payment integration
- Food Delivery Website:** (MERN) – Built a food ordering system with real-time order updates and admin dashboard.
- Chat App:** (React.js + Firebase) – Implemented real-time messaging with Firebase authentication and Firestore.
- Blogging App:** (React.js + Firebase) – Designed a blogging platform with user authentication and CRUD functionality.
- Facebook Clone** (MERN) – Created a social media clone with authentication, posts, and comments.
- AirForShare Clone:** (React.js + Firebase) – Built a file & text sharing platform with Firebase storage and Firestore for real-time synchronization across devices.
